SUMMARY

Recent Computer Science graduate with hands-on experience in React, Node.js, and JavaScript through academic projects and a software development internship. Built and deployed a responsive School ERP System and contributed to backend improvements at Evernote. Eager to apply technical skills, attention to detail, and collaborative mindset in a junior full stack developer role.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL(MySQL), HTML5, CSS3

Frameworks: React, Node.js, MongoDB, Mern Stack

Tools: Git, GitHub, Vite, Postman

APIs: REST APIs

Relevant Courses: Object-Oriented Programming, Database Management System, Operating System, GenAI

PROJECTS

School ERP System || *HTML, CSS, JavaScript, MY SQL,*

Teacher Management: Teachers can apply for jobs, wait for admin approval, and access their dashboard after approval. They can mark attendance and publish notices for students.

Student Management: Students can apply for admission, wait for admin approval, and access their dashboard after approval. They can view their attendance records and notices.

Admin Management: Admins can review, approve, or reject student and teacher applications, update user details, and manage notices.

System Features: Role-based access control with separate dashboards, attendance management, notice announcement system, and approval workflow for students and teachers.

Job Placement Portal || *Node.js, MongoDB, Express, React, HTML, CSS*

Recruiter: The recruiter panel lets recruiters manage companies, create and edit job postings, and review applicants for each job through protected admin routes.

Student: The student panel lets candidates browse jobs, view job details, apply for roles, update their profile and resume, and track application status

Project Layout: The repository is split into backend and frontend folders, with clean separation of API controllers, models, routes, and UI components, hooks, and state management.

Spotify-Clone || *HTML, CSS, JavaScript*

The JavaScript code uses the browser Audio API, DOM manipulation, and fetch() to load song files and metadata from the local songs folders.

The project builds a Spotify-like music player interface with playlist cards, a sidebar library, and playback controls.

It supports loading playlists dynamically, playing and pausing audio, switching tracks, adjusting volume, and updating the seek bar in real time.

EDUCATION

GH Raisonni Institute Of Engineering And Technology , Nagpur

2022 – 2026

Bachelor of Engineering – CSE (CGPA: 7.50)

Maharashtra

Defence Services Academy, Bhandara

2022

HSC (Percentage: 89.60%)

Maharashtra

New Orange City Convent, Warud

2020

SSC (Percentage: 78%)

Maharashtra

ACHIEVEMENTS

- Built multiple full-stack projects using modern web technologies and AI integration.
- Completed hands-on learning in Full Stack Development, Machine Learning, and GenAI.
- Actively improving problem-solving and development skills through real-world projects.
